

Shakir Ansari

Full-Stack Developer

Building web platforms, APIs, cloud-hosted applications, and media services.

hello@shakiransari.dev | github.com/shakiransari | linkedin.com/in/shakiransari

SUMMARY

Full-stack developer building web platforms, REST APIs, and cloud-hosted media services. Comfortable across the stack - from data models and backend services to React frontends and production deployment on Vercel, Render, and AWS. Focused on shipping small, dependable, well-documented products.

TECHNICAL SKILLS

Frontend	React, Next.js, Tailwind CSS, JavaScript
Backend	Node.js, Express.js, Python, REST APIs
Database	MySQL, MongoDB, Firebase
Cloud & DevOps	AWS, Docker, Linux, Nginx, Cloudflare

PROJECTS

Terabox Gateway 2024

[Python](#), [Flask](#), [REST API](#), [Vercel](#), [Render](#), [Cloudflare](#)

Flask API that resolves Terabox share links into direct streaming/download URLs. Deployed redundantly across Vercel (serverless) and Render (persistent) with Cloudflare in front for caching and TLS.

TeraPlay 2024

[React](#), [Vite](#), [Tailwind CSS](#), [HLS.js](#)

React + Vite streaming frontend that plays resolved Terabox media over HLS.js with custom controls and a responsive, mobile-first player UX.

BCA Notes 2023

[Next.js](#), [React](#), [Tailwind CSS](#), [Firebase](#)

Full-stack study platform organizing BCA course notes by semester and subject, with full-text search, Firebase auth, and a mobile-first reader.

FOCUS AREAS

- Full-stack development - database to UI, shipped end-to-end
- Backend systems - clean REST APIs, caching, and error handling
- Cloud deployment - Vercel, Render, AWS with redundancy and TLS
- Product development - scoping, building, and iterating with users
